

## REMARKS

Favorable reconsideration of the application as presently amended and in light of the following discussion is respectfully requested.

Claims 28-32 are presently pending in the application. Claim 1 is canceled and Claims 28-32 are added by this Supplemental Preliminary Amendment. Claims 2-27 were canceled by the previous Preliminary Amendment.

Newly added Claims 28-32 comprise features similar to features contained in Claims 16-20 which were canceled in the parent application serial no. 09/348,267 by way of the Amendment filed on February 28, 2001 in the '267 application. The preamble of newly added Claim 28 recites a storage medium "for use with at least one of a data recording device and a playback device," as recited in Claim 22 of application serial no. 09/630,430.<sup>2</sup> This feature of Claim 22 of the '430 application overcame a rejection of the apparatus claims under 35 U.S.C. § 101 by specifying that the information storage medium of Claim 22 is arranged to interact with the data recording and/or playback device. Thus, since the information storage medium Claims 28-30 of the present application have been drafted to comprise this feature, they are clearly statutory under 35 U.S.C. § 101.

Each of the newly added Claims 28-32 comprise control information including features allowable over the prior art. For example, newly added independent Claims 28, 31 and 32 each recite:

said control information includes at least one search pointer (S\_VOIGI\_SRP) describing a start address of video object group information (S\_VOIGI ) and at least one video object information for picture object (S\_VOIGI), the at least one video object information for picture objects (S\_VOIGI) including a still picture video object entry (S\_VOB\_ENT) which contains information for accessing objects including pictures, the at least one video object information for picture objects (S\_VOIGI) including information of an address of a first still picture (S\_VOG\_SA) and a size of a picture.

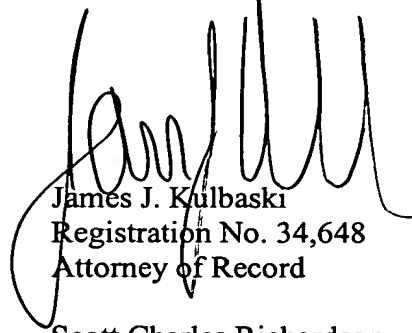

---

<sup>2</sup> The '430 application is a divisional of the '267 application.

Accordingly, a favorable action on the merits is earnestly solicited.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.

A handwritten signature in black ink, appearing to read 'James J. Kulbaski', is written over the printed name and title.
